SNOWBOARDING

the new
SLAB
series
2009-2010

all those of you who have been following our path for the last year, will instantly notice the new developments and progressive changes we've made for 14/15/16...

First up is our brand new sLAB series. These super strong + extremely light-weight aluminium bindings combine the most advanced freestyle features with the functionality of our FASTEC system. asymmetric and rotatable highback, triple cushioning system, toolless adjustments, new strap system, shorter micro-buckle, ... To name just a few...

in addition we've expanded our range to offer FASTEC technology to kids as well as the rider challenging nature and country.

have fun!
*we certainly will!

freestyle series

freestyle series girls

mountain pro

When hiking, less can be more... especially when carrying it back-country lightweight top performance for serious shredders!
men XL / L / M

- sLAB aluminium base
- fastec.1 highback
